

# CSCI316 Big Data Mining Techniques & Implementation

## Group Project Instructions

Autumn 2026

**This assessment item contributes 25% to the total marks.**

You will participate in a big data mining project as part of a group. Each student must join one, and only one, group. Groups should consist of 4 to 6 students.

All groups must be either self-formed or, if not, randomly assigned by the end of Week 7. All group members are expected to collaborate effectively. Failure to do so may result in penalty marks.

### **Deliverables:**

- **Slides:** Each group is required to prepare a set of presentation slides, which must be submitted via the designated submission link on Moodle. The slides must be submitted on or before the deadline, in either PDF or PPT format. Only one group member should submit the slides. **The first slide must include the full names, student numbers, and percentage contributions of all group members.**
- **Python Source Code:** The complete source code must be submitted as a ZIP file along with the presentation slides. All content presented in the slides must be supported by the corresponding implementation in the source code.
- **Presentation:** Each group will present their findings during the Week 12/13 lectures and labs (if needed). The presentation should be approximately 15 minutes in length, including 3-5 minutes for questions. **The submitted slides must be used during the presentation.** All group members are expected to participate in the presentation.

**Deadline:** All deliverables must be submitted by **11:30 PM on Sunday, 24 May 2026** (Week 11) via Moodle. The marking scheme is provided in a separate document.

## Marking Guideline for the project deliverables and presentations

The following criteria will be used to assess the project deliverables and presentations. The weighting for each criterion is indicated in parentheses.

### Marking Criteria

| <b>Content</b>                            |              |                                                                                                                                                                        |
|-------------------------------------------|--------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Correctness                               | 32%<br>(8.0) | Are the methods scientifically sound and appropriate? Is the presented implementation accurate and supported by the submitted source code?                             |
| Coverage                                  | 20%<br>(5.0) | Does the presentation address all project objectives? Are the approaches explained clearly? Is there a thorough discussion of data analysis, performance, and results? |
| Discussion of Topic/Intellectual stimulus | 12%<br>(3.0) | Did the presentation and discussion reflect a logical and coherent understanding of the relevant topics? Was the presentation engaging and intellectually stimulating? |
| Clarity of presentation                   | 8%<br>(2.0)  | Was the presentation well-organized, clearly presented and easy to follow?                                                                                             |
| <b>Speech</b>                             |              |                                                                                                                                                                        |
| Audibility and clarity of speech          | 10%<br>(2.5) | Was the speech clear and audible? Did the presenters speak confidently and engage with the audience?                                                                   |
| Timekeeping                               | 8%<br>(2.0)  | Did the group adhere to the time limit? Was the presentation time distributed fairly among group members?                                                              |
| <b>Use of Audiovisual aids</b>            |              |                                                                                                                                                                        |
| Arrangement of slides and use of diagrams | 10%<br>(2.5) | Were the slides visually effective? Were diagrams and visuals clear, relevant, and supportive of the content?                                                          |

All group members will receive the same mark unless individual percentage contributions are explicitly stated. If contributions are specified, marks will be distributed proportionally, with the full project mark awarded to the highest contributor and other members receiving marks relative to their declared contributions.

--END--
